Cocoon Floor Light

The Cocoon Floor Light is a development of the Cocoon Pendant, and likewise consists of eight beautifully laminated timber leaves. Weighted with a floor stand, the expressive design provides a superior way to enrich an environment and create ambient or brighter interiors.

The Floor Light is suitable for use with an energy saving bulb or a standard globe, (the latter can be fitted with a dimmer).

Sustainable, and with a low environmental impact, the floor light is available in four timber finishes.

Designer - Limahl Asmall

Development - Limahl Asmall & Alex MacMaster

Year of Launch - 2011

Process - Curved laminations of structural Aeroply and solid timber veneers

Materials - Available in Walnut, Sycamore, Oak and Cherry

Cleaning and Care - The wood is sealed and waxed. The product can be cleaned with a dry dust cloth when required and should occasionally be re-waxed with a quality polish to remove marks and bring out the beauty of the grain. Sunlight may cause discoloration of the timber over a period of time.
